Education

Holy Angel University

Bachelor of Science in Computer Engineering

May 2024

Angeles City, Pampanga

Experience

Codebility

2025 - present

Full Stack Developer Intern

Philippines (Remote)

- Actively developing a social networking platform connecting business people through shared interest, by utilizing Next.js and Firebase for Frontend and Backend functionality.
- Participated in code reviews, debugging sessions, and testing.
- Collaborated closely with developers and QA's to deliver high-quality features and ensure smooth deployment cycles.

Hooli Software, Inc.

2024

Software Engineer Intern

Marilao, Bulacan (Remote)

- Actively identified and addressed front-end bugs, and improved existing components.
- Collaborated closely with cross-functional team, including SE's, designers, QA testers.
- Provided updates on my task status during scrum meetings.

Projects

Stashio | Website

Next.js | TypeScript | Appwrite | Neon

- Developed and deployed a full-stack web application that allows users to manage and access files easily.
- Utilized Neon serverless Postgres Database for data storage, Appwrite for file storage, and Next.js for user experience.

Tapup | Website

Next.js | Node.js | Firebase | TypeScript

- Collaboratively developed a web app for creating and managing customizable portfolio cards that features a dynamic marketplace for users to buy, sell, and trade cards.
- Utilized Firebase for authentication and data storage, and Next.js, TailwindCSS, ShadcnUI for front-end development.

Wrappify | Website

React.js | TypeScript | Spotify Web API

- Developed a Spotify Wrapped inspired web app where spotify users can check their top tracks, artists, genres, playlists.
